PROFESSIONAL SUMMARY

Versatile Software Engineer with nearly 4 years of industry experience delivering full-cycle solutions in FinTech and enterprise domains. Specializes in C#/.NET, ASP.NET Core, SQL Server, and Oracle DB, with solid hands-on exposure to Angular, Azure DevOps, Jenkins, and microservices architecture. Consistently recognized for diagnosing complex system defects, shipping reliable releases across UAT and production environments, and working effectively within cross-functional Agile teams. Currently building a cloud-based microfinance SaaS product (FirstMicro) using modern .NET 8 and Angular 17+ stack at FINAP.

PROFESSIONAL EXPERIENCE

Fintechology Asia Pacific (FINAP) | Software Engineer

Nov 2024 – Present (1 yr 6 mos.)

- Research, design, and develop full-stack web applications using .NET Framework building intuitive front-end UIs and robust backend business logic for financial products.
- Generate regulatory and operational reports with SSRS; write complex stored procedures and queries against SQL Server and Oracle DB to support financial workflows.
- Own the full software development lifecycle (requirements, design, development, code review, QA, deployment) for multiple concurrent feature streams.
- Manage source code and branching strategy with Git/SourceTree, and support Jenkins CI/CD pipelines to ensure stable, repeatable deployments.
- Collaborate closely with business analysts and stakeholders to translate financial domain requirements into technical specifications and working software.

Scienter Technologies (Pte) Ltd | Associate Software Engineer

Jun 2022 – Oct 2024 (2 yrs 4 mos.)

- Diagnosed and resolved complex defects across the eFinancials leasing platform - covering .NET business logic, stored procedures, SQL query performance, and error-handling edge cases.
- Implemented new features and code modifications, coordinating end-to-end releases across UAT and live production environments with zero unplanned downtime.
- Conducted structured testing and validation to ensure all changes complied with financial industry standards and client-agreed acceptance criteria.
- Acted as a direct liaison with clients during acceptance testing phases, gathering feedback and translating it into actionable development tasks.
- Contributed to internal knowledge transfer sessions and supported onboarding of new team members on the eFinancials codebase.

V-Deploy | Software Developer (Internship)

Feb 2021 – Sep 2021 (8 mos.)

- Built responsive UI components using HTML5, CSS3, JavaScript, and ASP.NET MVC Razor Views, significantly improving the platform's cross-device usability.
- Introduced interactive front-end enhancements with jQuery - reducing page reloads and improving perceived application performance.
- Participated in sprint planning, daily standups, and code reviews, developing strong foundational Agile and version-control habits.

KEY PROJECTS

FirstMicro SaaS ASP.NET Core 8 · Angular 17+ · Azure SQL · Microservices

Cloud-based SaaS platform for the microfinance and lending sector, enabling financial institutions to manage the complete loan lifecycle - origination, credit approvals, disbursement, repayment scheduling, collections, and arrears management. Designed for scalability across multiple tenants. Contributed to core module development, API design, and system performance optimization.

- Developed RESTful API endpoints using ASP.NET Core 8 and implemented Angular 17+ components for the loan management dashboard.
- Integrated Azure SQL with Entity Framework Core; optimized slow queries reducing average report load time significantly.
- Participated in microservices decomposition planning - separating notification, reporting, and loan-processing services.

eFinancials Systems .NET Framework · SQL Server · SSRS

Enterprise web-based leasing finance platform used by 20+ financial companies and several leading Sri Lankan banks. Handled a broad scope of day-to-day development and maintenance across leasing workflows including asset management, installment schedules, and regulatory reporting.

- Resolved 100+ production defects across 2+ years, maintaining high system availability for live financial operations.
- Authored and optimized complex T-SQL stored procedures processing large transaction volumes with improved execution plans.
- Produced SSRS reports for audit trails, portfolio summaries, and regulatory submissions consumed by bank compliance teams.

V-Deploy Platform HTML5 · CSS3 · JavaScript · jQuery · ASP.NET MVC

Internal deployment and operations management platform. Redesigned key UI modules to be fully responsive across desktop and mobile and introduced asynchronous data loading patterns using jQuery AJAX to reduce server roundtrips and improve responsiveness.

TECHNICAL SKILLS

Languages	C#, Java, Python, JavaScript (ES6+), HTML5, CSS3, T-SQL, PL/SQL
Backend	.NET Framework, ASP.NET Core 8, .NET Microservices, Web API, Entity Framework Core
Frontend	Angular 17+, jQuery, Razor Views, Bootstrap, WordPress
Databases	SQL Server, Oracle DB stored procedures, complex joins, query optimization, indexing
DevOps / CI/CD	Jenkins, Azure DevOps, Bitbucket Pipelines, TFS, Git, SourceTree
Reporting	SSRS (SQL Server Reporting Services), Crystal Reports
Cloud	Azure SQL, basic Azure services exposure
Methodology	Agile / Scrum, Jira, full SDLC, code review, UAT coordination
Other	Linux, Windows, AI-assisted development (GitHub Copilot, prompt engineering)

EDUCATION

BSc (Honours) in Information Technology	2018 – 2022
Sri Lanka Institute of Information Technology (SLIIT)	

PROFESSIONAL STRENGTHS

Production Stability Track record of zero-downtime deployments across financial platforms serving 20+ institutions.	Complex SQL Expertise Deep experience writing and optimizing stored procedures, execution plans, and large-dataset queries.	Full-Stack Delivery End-to-end ownership from backend API to Angular UI - shipping complete features independently.
FinTech Domain Knowledge Understands leasing, microfinance, loan lifecycle, and regulatory reporting requirements from hands-on project work.	Agile Team Player Experienced in sprint ceremonies, Jira task management, and cross-functional collaboration with BAs and QA teams.	Continuous Learner Self-driven adoption of AI tooling, modern .NET patterns, and cloud technologies alongside active project delivery.
